Pool Tiger

THE POWER OF WATER IN YOUR HANDS

Recovers the water in 72 hours

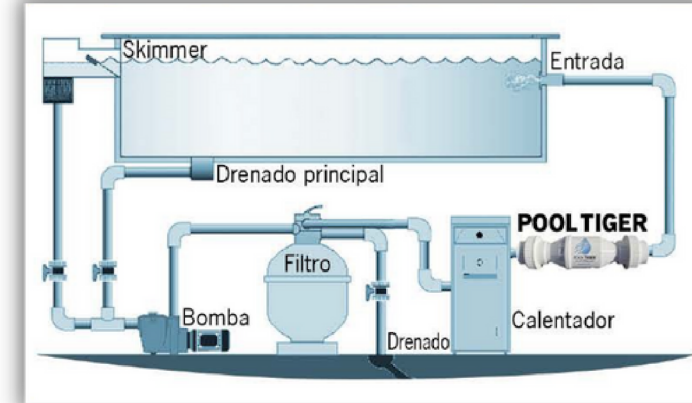

Installation in a battery configuration.

EASY TO INSTALL

NO MAINTENANCE OR REPLACEMENTS REQUIRED.

In new pools, Pool Tiger should be installed as the last device in the return line. In existing pools with a heater, it should be installed before the heater in the return line. If the return line is too short to install Pool Tiger in-line, a bypass can be created. Pool Tiger can be installed horizontally, vertically, or diagonally.

Installation of a single Pool Tiger.

Pool Tiger is the only 100% natural water purifier on the market. It is easy to install, requires no electricity or future replacements. Simply place it in the return pipe - it should be the last device in the line and let it do its work.

Pool Tiger operates on the principle of hydraulic harmonics through cavitation. The water passes through a specially designed and patented nozzle, transforming from liquid to gas (water vapor) and instantly back to liquid again, leaving a heat signature of up to 200°C. This process offers the following benefits:

1. Pool Tiger reduces the use of chlorine and other chemical products, such as flocculants and pH regulators, by up to 85%.
2. Protects and prevents equipment corrosion, extending its lifespan.
3. Complementary to any disinfection system: Salt chlorination, chlorine, bromine, UV, etc.
4. Prevents and eliminates calcium deposits and existing scaling.
5. Disinfects all types of algae, viruses, and bacteria.
6. Destroys combined chlorine, chloramines, and their characteristic odor.
7. Gradually reduces the levels of cyanuric acid.
8. Quick installation, less than 20 minutes.
9. No electricity consumption required!
10. No maintenance or replacement parts needed.
11. 2-year warranty, extendable to 5 years by registering on the website.
12. Compatible with other pool equipment.
13. Provides a healthier and more enjoyable swimming experience.
14. Generates structured water that protects the skin and eliminates the harmful effects of chlorine.
15. Recommended for prolonging the life of reinforced liner and polyester pools and preventing discoloration.

Unlock the full potential of your pool with Pool Tiger and enjoy a safer, more efficient, and hassle-free swimming experience.
